PROJECTS

Recipe Repo | https://github.com/jeffMullen/recipe-residence | https://desolate-atoll-16678.herokuapp.com/
- Full-Stack MERN application using GraphQL. Designed for users to record their own recipes, search for recipes created by other users, and update each recipe to their own preferences. A way for families living at great distances to share recipes in our modern world.
- Lead Front-End Engineer responsible for building reusable React components. Created responsive design, stylings with SCSS, and handled state management.
- Back-End responsibilities included writing GraphQL TypeDefs and Resolvers.

Grove | https://github.com/lapshaffer/SustainableReviewsProject | https://obscure-ocean-20287.herokuapp.com/
- Full-Stack review site for consumers to convey experiences with companies based on their sustainability practices. Provides accountability for companies to follow their claims of sustainability standards.
- Lead Front-End Designer responsible for CSS implementation, responsive mobile-first design, login and logout JavaScript functionality.
- Team of four developers exhibiting cohesiveness and trust, as well as the ability to reach out for help when needed.

Star Books | https://github.com/az84/Project-1 | https://az84.github.io/Project-1/
- A librarian focused application designed to aid in the curation of collections. Presents librarians with search results based on popularity to compliment professional publications that account for literary merit.
- Role of CSS and dynamically displaying search results with JavaScript.
- Team of three developers.
